

Your Single Source For Innovative
Architectural Concrete Solutions

SANDSCAPE TEXTURE™ BY BOMANITE

Technical Bulletin

Sandscape Texture by Bomanite is designed for outdoor applications where an alternate to conventional concrete finishes is required. Sandscape Texture, one of three Exposed Aggregate Systems offered by Bomanite for architectural concrete surfaces, utilizes specialized concrete mix designs, additives, topical treatments and advanced application procedures. The finished Sandscape Texture product resembles sand blasted concrete and can incorporate specialized colored sands in the concrete and aggregates exceeding 3/8" in diameter. The final product is an economical alternate to other decorative finishes while producing a monolithic concrete slab with a low life cycle cost due to the pre-aged nature of the surface. Applications include plazas, shopping centers, schools and exterior walkways—anywhere improved wear resistance for light- to moderate-duty vehicular or foot traffic is necessary. These highly durable surfaces are available in a multitude of standard and custom options, including light-reflective formulations that reduce heat island effect.

FEATURES AND BENEFITS:

- **Decorative small aggregate exposure**
- **Durable for sustainable design**
- **Eliminates the need to sandblast**
- **Increased surface and slip resistance**
- **Permanent, lightfast colors**
- **Economical**

GENERAL INFORMATION:

Colors

Available in 25 standard colors. Refer to the Bomanite Integral Color chart for color selection and names. Custom colors are available.

Limitations

- Before application, a 100-foot square mock-up using actual jobsite products and installation methods must be produced for owner and architect approval.
- The finished Sandscape Texture system is highly dependant upon ambient conditions, adequate labor, applicator experience, proper equipment, proper curing and other factors.
- Proper timing is essential for successful installation of this product. Follow all of the specified procedures found in the Bomanite Sandscape Texture by Bomanite Application Guideline.
- Architectural concrete requires extra care during construction. It must be protected from staining and damage until the concrete goes into service. Many factors, including jobsite conditions and applicator methods, can affect the final shade, color and appearance of a colored concrete installation.
- Do not use in areas exposed to acids, their salts or other materials known to rapidly attack or deteriorate portland cement concrete.
- Make certain the most current versions of application procedures and MSDS are being used.

Warranty

This product is warranted to be of uniform quality within manufacturing tolerances. Since control is not exercised over its use, no warranty, expressed or implied, is made as to the effects of such use. Seller and manufacturer obligations under this warranty shall be limited to refunding the purchase price of that portion of the material proven to be defective. The user assumes all other risks and liabilities resulting from use of this product.
